

I have my own copies of contracts and payments from ISC. At first I was charged \$645.00 for enrollement with ISC. Then a payment plan for their services that included from getting my Patent to selling my idea. This came out to 10,292.68 with a monthly installments for three years. With this happening I believe I didn't need to pay for anything else. About a year later I recieved a memo with an application from another attorney Ivar M. Kaardal from Kaardal and associates, a assistant commissioner of Patent. They where charging me \$165.00 Basic fee for my United States Patent and Trademark Application. I did recieve my patent But it seemed that I payed extra for my patent. ISC did not pay out of my payments that was included in the contract for my Patent services. This means that not only ISC didn't pay for my Patent out of the actual payment installments But they didn't even show me after that any positive feed back. ISC only send me a small computerized catologe and a bunch of manufactures that maybe would be interested.

ISC also stated that they would

Take my Design & make a Deal with
[REDACTED] and other Companies. That they would
personally shop my Idea/design out in every
industry all I received was papers no
fee back. In the contract it also states
if the Design sales they would get a 22%
of what it makes. Meaning that in their
goal mine and all they did was nothing
But send me papers making me think
they where doing their part. I know
with what they presented me with I could
of done it myself But I thought it took more
than that, that's why I went to them.
I wish you can help me brake that contract
and help me receive the money I already
been paying About 4.5 thousand already.

P.S. my checks has been
send to
Universal Finance Company Inc.
P.O. Box Pittsburgh PA. [REDACTED]
15230

I Don't understand the relationship Between
this two company, maybe IBC got a Loan under my name
from them and if they did please have IBC cover the charges
on my contract and return me back the money I have already made.
